### **Discussion summary:**

As a team, we went over what needs to be completed for deliverable 3 which is the implementation part of the project. We decided to create a skeleton of our code for the model, controller, and view. Each person from the team will get an opportunity to code the front end and back end so the work is split up evenly.

We discussed the check-in 4 which is the code walkthrough and the Data Iteration assignment that is due on May 26th, 2019. We also edited the task matrix and assigned the tasks needed to be done by the next meeting. Next meeting is also scheduled, the facilitator and minute taker is announced.
