Discussion summary:
As a team, we shared our work from the last week and shared input on each others work. We also talked about design architectures and watched videos explaining Model View Controller. We then decided to update our diagrams based on that architecture.

We discussed implemented new user stories (sorting & getting name and email). We also talked about the requirements for deliverable 2, and split up the work so everybody can have something to work on. We will prepare our project for check-in 3 as a rough draft, and then make changes based on the feedback from classmates. The project is currently on track.
